January 2007	145		
January 2008	160		
January 2009	170		
January 2010	To Be Determined	To Be Determined	To Be Determined

To date, we know that H1N1 is circulating in our county. This weekly report provides information regarding influenza activity in Lenawee County as follows:

- **Flu Like Illnesses Reported:** These reports come from weekly reports from Lenawee County schools and daycare centers.
- **Positive Rapid Flu Tests:** This is a test for flu and does not distinguish between seasonal and H1N1 flu.
- **Confirmed H1N1 Tests:** Confirmed tests do not give the complete picture of H1N1 in Lenawee County. Not all people with influenza like symptoms are given a test to see if they have H1N1. We can assume that there are probably many more people in the county who have H1N1 than is indicated by this number.

The Lenawee County Health Department will update this report on a weekly basis and post it on our website www.lenawee.mi.us/health_department.
