

LENAWEE COUNTY SMOKE-FREE WORKSITE REGULATIONS

Regulations for the establishment of smoke-free public and private worksites and smoke-free public places that do not include bars and restaurants.

Section 1000. Title

These articles shall be known as the Lenawee County Smoke-free Worksite Regulations.

Section 1001. Authority

These regulations are hereby adopted pursuant to authority conferred upon the Lenawee County Health Department by the Michigan Public Health Code, 1978 P.A. 368, as amended.

Section 1002. Jurisdiction and Administration

- A. These regulations shall have effect throughout Lenawee County in all areas incorporated and unincorporated, which includes cities, villages, and townships.
- B. The Health Officer shall have responsibility for administering and enforcing these regulations, including all amendments hereafter adopted unless otherwise specifically stated.

Section 1003. Purpose

- A. Lenawee County hereby finds and declares that:
 - 1. The U.S. Surgeon General, National Research Council, and National Academy of Sciences, report that environmental tobacco smoke causes lung cancer in healthy adult nonsmokers, and can cause lung function and structure alteration to the fetus of pregnant nonsmoking women. Additionally, in utero exposure is known to predispose children to long-term pulmonary risks. Further, these agencies found, separating smokers and nonsmokers within the same air space may reduce but does not eliminate a nonsmoker's exposure to environmental tobacco smoke.
 - 2. The U.S. Environmental Protection Agency (EPA) finds that environmental tobacco smoke is a Group A Carcinogen - a category reserved for known cancer-causing agents in humans.
 - 3. The National Institute for Occupational Safety and Health (NIOSH):
 - (a) finds that secondhand smoke poses an increased risk of lung cancer and heart disease to people exposed in the worksite; and,
 - (b) recommends that nonsmokers should not be exposed to secondhand smoke.

- B. These studies find that tobacco smoke is a major contributor to indoor air pollution, and that breathing secondhand smoke is a cause of disease, including cancer, heart disease and stroke in nonsmokers. At special risk are infants, children, teens, pregnant women, elderly people, nonsmokers with long-term exposure to secondhand smoke, individuals with cardiovascular disease, and individuals with impaired respiratory function, including the young, asthmatics and those with obstructive airway disease. Also harmed are those with health conditions induced by breathing secondhand smoke including asthma, lung cancer, heart disease, respiratory infection, decreased respiratory function, including bronchoconstriction and broncho-spasm.
- C. Accordingly, Lenawee County finds and declares that the purpose of these regulations is to protect the public health and welfare by regulating smoking in public places and places of employment and recreation.
